

5-8 September 2023

## 8<sup>th</sup> Meeting of the IOBC-WPRS Working Group “Integrated Control of Plant-Feeding Mites”

Belgrade, Serbia

Belgrade 2023

### **Aims & Topics**

This meeting invites scientists and professionals from public and private sectors, as well as graduate and post-graduate students dealing with integrated control of mite pests in greenhouse and crops grown outdoors.

The Working Group areas of interest include: new developments in biological and chemical mite control; integrated management of mite pests; biology; behavior and ecology of predatory mites and their prey, above and below ground; and the effects of climate change on mite pest management.
